** Admittance into these courses requires a 2.67 GPA.

¹This is the only part of the University Studies Requirements that transfers students with an associate degree need to complete.

²The economics major is a popular dual major for students, particularly in the College of Business. For example, finance majors also can earn a degree in economics by taking one or possibly two economics courses in addition to the courses required for the finance major.

³Any upper division (i.e., 3000 or above) economics courses will meet this requirement except Econ 3900, 4250, 4950, 4990, and 5950.

⁴The prelaw emphasis is popular as a dual major for students in political science or other programs outside of the College of Business.

⁵The regular calculus series (Math 1210 and 1220) is recommended for economics majors contemplating graduate studies in economics.
